SECTION 5 – STATUS OF EXPLORATION PROJECT

Summary of previous work

Since the 1950s, more than 180 diamond drill holes have been completed on the property, along with several geophysical surveys. The compilation and interpretation of the data made it possible to define targets and carry out various works, leading to the discovery of several showings, including the Castor showing. The latter returned grades of up to 7.44 g/t Au, 4.8% Zn and 40 g/t Ag over a core length of 4.0 m in drill hole 4041-98-20. All the showings identified confirm the excellent discovery potential of the area.

SECTION 6 – DOCUMENTS TO JOIN

- ☒ Map in PDF format¹
- ☒ Shapefile (DBF, PRJ, SHP, SHX)²

¹ Exploration property map with the location of the planned work.
² The shapefile must include the property's exclusive exploration rights numbers and the location of the planned work.
